

ims wellth care inc.

Turning insurance into *daily* experiences.

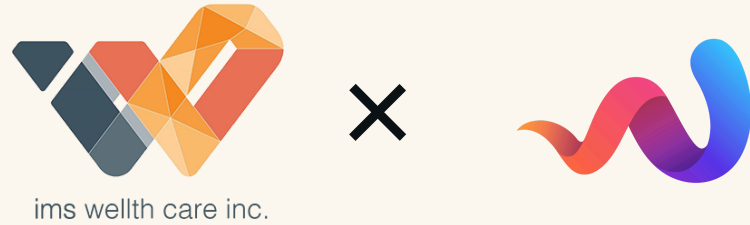

PREPARED FOR

Ms. Maxine Almanzor

Chief Executive Officer

IMS Wellth Care, Inc.

EXECUTIVE SUMMARY

Three priorities, delivered fast.

WellX proposes a strategic partnership with IMS Wellth Care that delivers immediate, measurable value while supporting your long-term goals of cost control, member retention, and competitive differentiation in the Philippine HMO market.

01

Reduce call center workload

Ready-to-deploy self-service for member inquiries, claims status, and LOA processing — handling 60–70% of common queries without human escalation.

02

Drive telemedicine utilization

Integrate IWC's existing telemedicine platform directly into the member experience, reinforced with xCoins rewards that make virtual care the default first step.

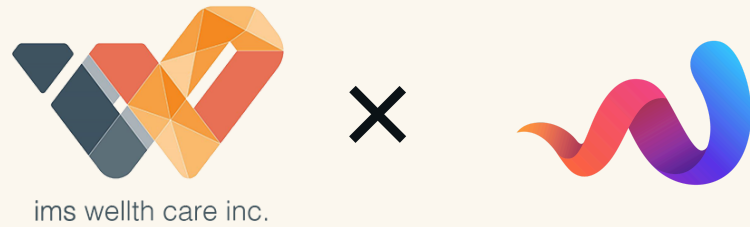

03

Steer members to preferred clinics

Tiered xCoins rewards that route members to partner facilities first — and IWC-owned clinics with the highest reward — making the preferred path the easiest path.

WHY NOW

Quick wins require light integration, can be piloted rapidly, and generate visible ROI within the **first 3–6 months**.

DEAL HIGHLIGHTS

Low-risk entry, built for scale.

Four structural commitments designed to remove friction from a Year-1 decision while protecting IWC's economics as the program grows.

01 · BILLING MODEL

Active members only

You only pay for engaged users — no fee on dormant members. Spend tracks engagement, not enrollment.

QUARTERLY AVERAGE MAU

02 · BRANDING

White Label included

Fully branded as IWC's own app at no extra cost on multi-year terms. Members never see a third-party brand.

\$50K VALUE · WAIVED

03 · INTELLIGENCE

Co-built AI customer service

Trained on IWC's specific policies during Year 1. Internal pilot with staff. Live to members in Year 2.

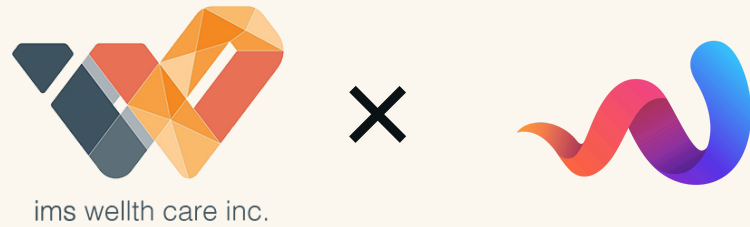

YEAR 1 BUILD · YEAR 2 LIVE

04 · TIMELINE

Pilot-ready in 30 days

Rapid deployment, measurable impact within 30 days. Phased rollout — soft launch, scale, AI build, AI live.

FROM CONTRACT SIGNING

ABOUT WELLX

A health insurtech that rewards the right behaviors.

WellX is a health insurtech platform that makes insurance more engaging and preventive by rewarding healthy behaviors. Members earn xCoins for positive actions and manage their coverage through a simple, intuitive app.

Our mission is to turn passive coverage into an *active, rewarding partnership* — built on four years of regional behavioral data across the GCC and Southeast Asia.

PROVEN RESULTS

A leading KSA insurer. One SDK. Three numbers.

A leading KSA insurer deployed the WellX SDK with gamification, embedding wellness directly into their member experience. Within six months, the engagement curve looked unrecognizable next to their pre-launch baseline.

ACQUISITION

50%

App download lift

Versus the insurer's prior member app — driven by clearer value (rewards, telemedicine, real-time claims) at the install moment.

STICKINESS

80%

6-month retention

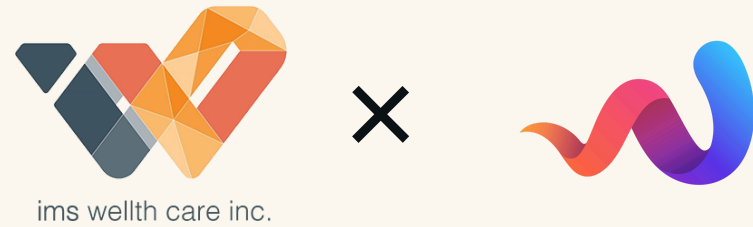

Members still active six months after first session — well above industry-standard retention curves for insurance apps.

ENGAGEMENT

40%

Activation rate

Members who completed at least one rewarded behavior in their first 30 days — the leading indicator of long-term retention.

WHAT WE'LL BUILD TOGETHER

A single integrated app — fully branded as IWC's own.

Self-service insurance management, embedded telemedicine, and behavioral rewards that drive measurable health outcomes — packaged as four product modules.

01

REDUCE WORKLOAD

Insurance Manager

SELF-SERVICE

- Policy details & benefits on-demand
- Real-time claims status & updates
- Digital insurance card
- Push notifications for approvals
- Handles 60–70% of common inquiries

02

DRIVE UTILIZATION

Embedded Telemedicine

IWC NETWORK

- In-app video consults
- Symptom triage flow
- Digital prescriptions in-app
- Doctor sees member's policy inline
- xCoins earned per completed visit

03

STEER BEHAVIOR

xCoins Clinic Rewards

TIERED REWARDS

- IWC-owned clinics earn the most
- Partner clinics earn mid-tier
- QR check-in at clinic reception
- LOA auto-populates at check-in
- Variable bonus surprise rewards

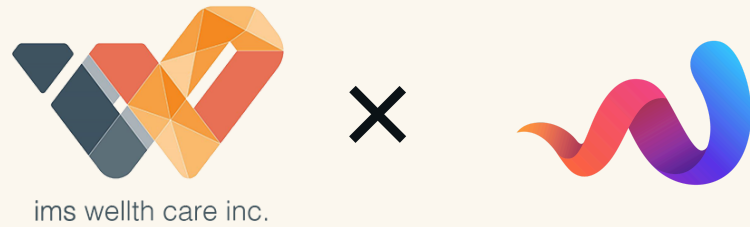

04

YEAR 2 · CO-BUILT

AI Customer Service Agent

YEAR 2 ROLLOUT

- Trained on IWC's own policies
- Year 1: internal staff pilot
- Year 2: live to all members
- Targets +30–40% deflection
- IWC brand voice & tone tuned

JOURNEY 01

Talk to a doctor in five minutes.

THE GOAL

Shift minor consultations from in-person clinic visits to telemedicine — reducing claims cost and improving member convenience.

EXPECTED IMPACT

- 30–50% shift of minor consults from clinic to telemedicine
- ₱500–₱1,500 saved per shifted consult (industry benchmark)
- Higher member satisfaction — 5-min access vs. 1-hour clinic visit

STEP 01

Trigger

Member feels unwell. Opens IWC app — home screen shows prominent **"Talk to a Doctor"** tile. Push notification: *"Feeling unwell? Get a doctor in 5 minutes — earn 50 xCoins."*

STEP 02

Pre-Consult

Member taps tile → quick symptom checker (3–4 questions). App suggests telemedicine for mild cases, in-person for urgent. Member's policy and benefits auto-populate in the background.

STEP 03

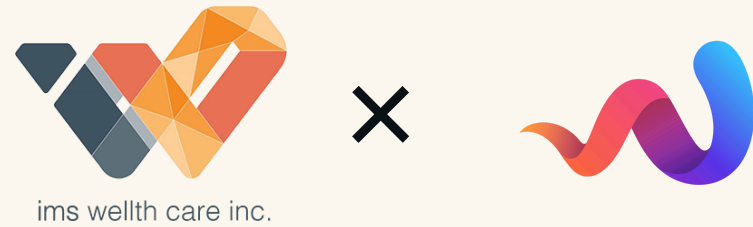

Consult

Embedded video call with IWC's doctor network. Doctor sees member's policy, prior consults, medications inline. Average call: 8–12 minutes.

STEP 04

Reward

Member earns **50 xCoins** for completing the consult, plus **25 bonus xCoins** for rating it. Digital prescription delivered in-app.

ims wellth care inc.

JOURNEY 02

Steer the visit before it happens.

THE GOAL

Steer members toward IWC partner and company-owned clinics — reducing out-of-network costs and increasing volume at preferred facilities.

EXPECTED IMPACT

- 20–35% increase in visits to company-owned clinics
- 15–25% shift from out-of-network to partner clinics
- ₱200–₱800 saved per redirected visit
- Higher preventive care utilization, reducing long-term claims

STEP 01

Discovery

App home screen surfaces nearest IWC clinics with reward amounts displayed. Higher rewards visible for company-owned facilities. **Members see options before they need care.**

STEP 02

Pre-Visit

Member taps clinic → "Check In Here" button generates a one-time QR code. Day-of push reminder: *"Don't forget to check in to earn xCoins!"*

STEP 03

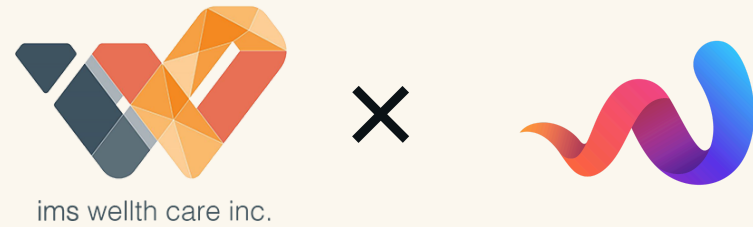

At Clinic

Clinic staff scans QR code at check-in. Member sees instant confirmation. **LOA auto-populates — no separate paperwork.**

STEP 04

Reward

xCoins credited within 24 hours after visit. Notification reinforces the reward. Educational content suggests preventive screenings for **double xCoins**.

HOW BEHAVIOR CHANGE HAPPENS

Three principles that do the work.

The platform is designed around behavioral science: reward the right action, make the preferred path the easiest path, and use variable rewards to build lasting habits.

01

Reward the behavior, not the outcome.

Members can't always control health outcomes — but they can control behaviors. We reward the right step taken, not the result, so the system is fair and consistently motivating.

02

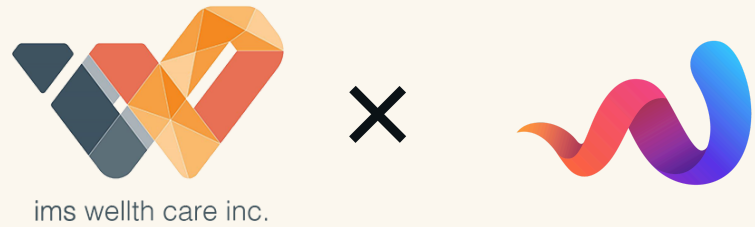

Make the preferred path the easiest path.

The IWC partner clinic is one tap away. Out-of-network requires deliberate effort. When the right choice is also the easiest one, behavior follows architecture — not willpower.

03

Variable rewards beat fixed rewards.

Occasional bonus surprises drive far stronger engagement than fixed rates. This is well-established behavioral science, and it's how we sustain interest beyond the early novelty.

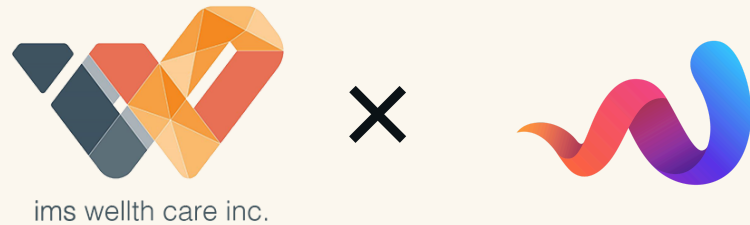

COMMERCIAL TERMS

Year-1 risk down, scale rewarded.

Pricing structured to minimize Year 1 risk for IWC while building toward sustainable, scalable revenue as activation grows. Active members only — billed on quarterly average MAU.

PRICING COMPONENTS		
COMPONENT	USD	PHP
Setup fee One-time · waived on 2-year · Includes integration, brand alignment, content calibration, team training	\$25,000	₱1.5M
Per active member, annual Volume discounts available — see tiers · Includes all 4 modules + admin portal	\$20	₱1,200
Minimum active member floor Year 1 minimum · contractual	20,000 members	
White Label One-time · waived on 2-year	\$50,000	₱3M
AI Agent co-build Year 1 — scope to be defined jointly	TBD	TBD
AI Agent live Year 2+ — pricing finalized at scope agreement	TBD	TBD

TIERED PRICING — MORE ACTIVE MEMBERS, LOWER COST			
TIER	ACTIVE MEMBERS	USD / MEMBER / YR	PHP / MEMBER / YR
Tier 1	Up to 20,000	\$20	₱1,200
Tier 2	20,001 – 35,000	\$17	₱1,020
Tier 3	35,001 – 60,000	\$15	₱900
Tier 4	60,001 – 80,000	\$13	₱780
Tier 5	80,001 – 100,000	\$12	₱720
ACTIVE MEMBER Any IWC member who logs into the platform at least once during a calendar month (industry-standard MAU). Billing is calculated on the average MAU across each quarterly cycle.			

THE PAYBACK MATH

₱100/mo
× 12 months
= ₱1,200/yr
per active member.

Just **two (2) telemedicine consultations vs clinic visit savings** covers the entire annual cost.

Everything beyond that — claims reduction, telemedicine shift, retention — is pure margin for IWC.

WHY ₱100/MONTH IS A BARGAIN

The PMPM cost is comfortably justified by the operational savings IWC unlocks — usually within the first quarter of usage.

Single avoided call center inquiry

₱30 – ₱60

Average HMO member generates 4–6 inquiries per year

₱600 – ₱1,500

One avoided LOA processing event

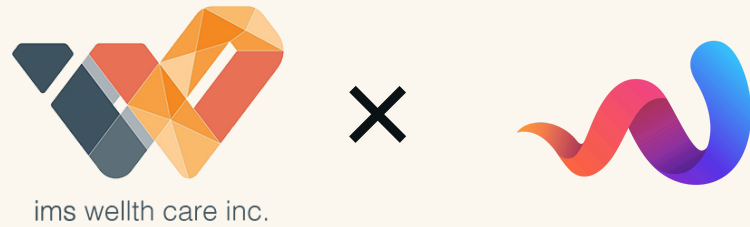

~30 min

One telemedicine consult vs. clinic visit

₱500 – ₱1,500

One renewal retained per 100 members

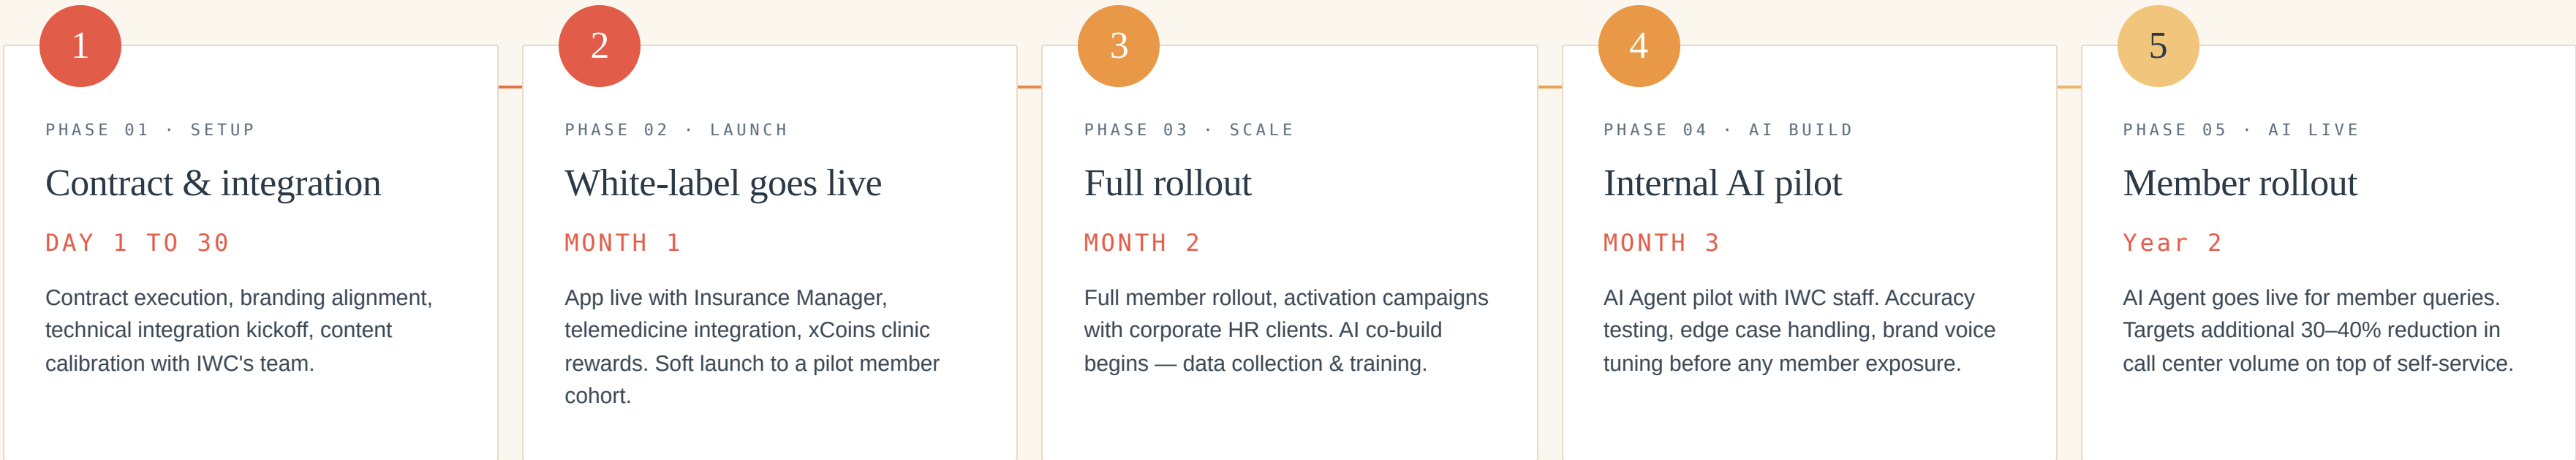

₱20K – ₱50K

IMPLEMENTATION ROADMAP

Live with members in 30 days

Five phases from contract signing through Year 2 AI launch. Each phase has a defined deliverable and a measurable handoff.

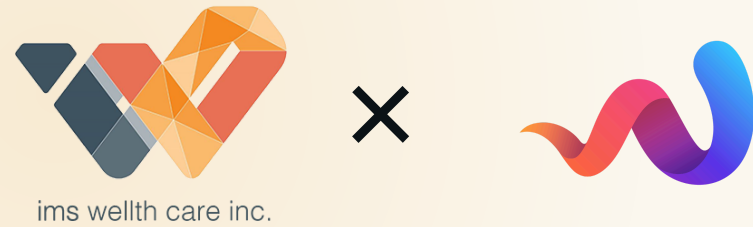

WHAT WE NEED FROM IWC

TO KICK OFF PHASE 01.

- Designated leads from operations, marketing, underwriting
- Approval on app branding — logo, color, naming
- Telemedicine network API access

- Access to policy docs, benefit schedules, claims workflows
- SME time during AI co-build (~4 hrs/week, Mo. 4–9)
- Internal comms support for member activation

CONFIDENTIAL

THE FUTURE WE'RE BUILDING TOGETHER

The future of insurance
is not managing risk
when it appears.
It's *influencing behavior*
before it does.
